

# Easy Shed Installation

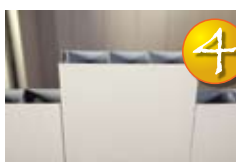

**1 Assemble and install optional base.** After preparing ground beneath base, position interlocking base bottom pieces and base top pieces per instructions (Note: Foundation base also may be constructed of concrete or treated lumber.)

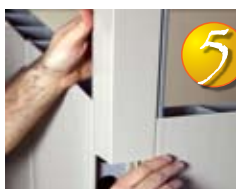

**2 Secure base tops and bottoms** with screws provided as specified in instructions.

**3 Attach channels to base** as directed.

**4 Slide storage building wall panels together into channel.** Identify appropriate panels and slide together.

**5 Slide wall corners into wall panels** at building corners.

**6 Place roof gables over walls.** Secure as directed.

**7 Assemble ridge beam with metal insert** and attach at gables.

**8 Slide roof panels into ridge beam.** Each panel locks together.

**9 Attach fascia caps to roof edge.** Secure with screws per instructions.

**10 Mount door(s).** See instructions for storage buildings equipped with steel doors or vinyl doors.

\* The foundation is not included in the Royal Storage Building kits.
